

CHECKING THE WEATHER

WEATHER APPS AND WEBSITES

As a drone pilot, you would like to get some specific parameters besides the general weather situation. Flying in wind can be difficult and will drain your drone battery faster than normal, and rain is detrimental to anything electronic. Cold temperatures cause batteries to lose charge faster and extreme heat can put unnecessary wear and tear on batteries and computers. There are countless apps and websites for weather information, below you will find two free options.

Where do I check the weather?

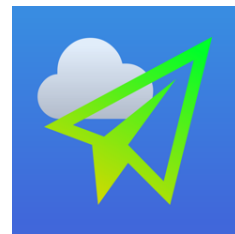

Two great free tools for checking weather conditions are:

UAV forecast

<https://apps.apple.com/us/app/uav-forecast/id1050023752>

https://play.google.com/store/apps/details?id=com.uavforecast&hl=en_AU

<https://www.uavforecast.com/>

And the Bureau of Meteorology

<http://www.bom.gov.au/>
